

## Description:

## Task

Given a number  $n$ , return the logical negation of  $n$ , i.e., return 1 if  $n = 0$ , otherwise return 0.

## Restrictions

- You may **only** use at most 28 characters
- You may **only** use the following characters: `[0-9]`, `[a-z]`, `(, )`, `+`, `~`, `&`, `|`, `^`, `<`, `=`, `>` (`[A-Z]` and whitespace characters are **not** allowed)
- You may **only** use the character `+` at most 2 times
- You may **not** use the following operators: `&&`, `&&=`, `||`, `||=`, `<`, `<=`, `==`, `===`, `>=`, `>`. This implies that **only** the following operators (and their respective assignment counterparts) are allowed: `+`, `~`, `&`, `|`, `^`, `<<`, `>>`, `>>>`

## Examples

```
negation(0) // 1
negation(1) // 0
negation(-1) // 0
negation(32) // 0
```

## Constraints

- $-2147483648 \leq n \leq 2147483647$
